

## About

### Lamarr Security Research

Lamarr Security Research is a non-profit research center founded by SGS and Graz University of Technology. With its research it aims at creating the technological foundations for trustworthy systems and products. It is an independent and open center where all stakeholders agreed to make research results available to all and to bring high value to society.

We are always welcoming new researcher, there are no specific application deadlines.

# Senior Researchers & Postdocs

## Position

We are looking for passionate researchers with proven scientific expertise in the field of Security & Privacy. The following areas are of particular interest:

- **Usable Security & Privacy**
- **Formal Methods and Security**

Lamarr Security Research is the centerpiece of the Cybersecurity Campus Graz, which unites security&privacy research, education, testing and certification under one roof. We offer a vibrant research environment, which already today includes more than 70 academic researchers today and which is expected to grow significantly during the next years.

As a senior researcher, you have the opportunity to build up your own research group and to closely work not only the groups at Lamarr Security Research, but also with the teams at the [Institute of Applied Information Processing and Communications](#) at the Graz University of Technology. We offer a competitive salary and generous research funding.

The city of Graz has is a great place to live. There are about 60,000 students studying at the universities and colleges in Graz. With a population of roughly 300,000 inhabitants, the city is nicely situated between the Alps in the north and the hilly Styrian wine-growing area in the south. The city center is a UNESCO world heritage and a perfect place to enjoy the southern Austrian flair and the mild climate.

## Requirements

- Completed university education with a doctoral degree (PhD)
- Excellent scientific achievements
- Management and leadership abilities
